

CONSCIOUS ELEGANCE

Let yourself be seduced by Element4

DISCOVER THE NEWEST GENERATION OF ELECTRIC FIREPLACES!

Are you looking for an electric fireplace with a realistic flame picture and stylish design? Then choose an Element4 fireplace. At the forefront of innovation and design in the world of electric fireplaces these fireplaces are for designer conscious consumers like you.

A fireplace that fits you perfectly

Are you someone who likes to look ahead? Who makes conscious choices with a view to the future, but at the same time is critical when it comes to design and technology? Then an Element4 electric fireplace is for you. Our electric fireplaces distinguish themselves with a beautiful flame picture, built-in heating, various installation possibilities and an almost invisible glass plate. In combination with the latest LED technology and convenient control via your app, this unique fireplace is an absolute innovation in the world of electric fireplaces.

DUTCH COMMON SENSE WITH GLOBAL ALLURE

Element4 is a top Dutch brand. We work practically and pragmatically, but with a strong focus on design. This ensures that our fireplaces are loved around the world by designers, architects and trend-conscious consumers. As real 'Dutchies', technology is an important issue for us. Therefore our electric fireplaces can be controlled with an app, they have the latest LED technology and anti-reflection glass. The end result: a particularly stylish electric fireplace with a surprisingly realistic effect.

CONTROLLABLE WITH YOUR SMARTPHONE OR TABLET

All Element4 electric fireplaces can be controlled via your smart phone or tablet via the Element4 app. This allows you to control both the flame picture and the heat output of the fire and gives you complete control ability at the touch of a few buttons.

ANTI-REFLECTIVE GLASS FOR REALISTIC EFFECT

The special anti-reflective glass gives Element4's electric fireplaces a special effect. You hardly notice that there is a glass plate in front of the fireplace. In combination with the realistic flame picture you get the real 'fireplace feeling' in your home.

ULTRA HD LED TECHNOLOGY

Your fireplace comes standard with Ultra HD LED technology. This creates a deep and rich flame picture and, thanks to the unique reflective power, creates the effect of hot ash in the fuel bed. The LEDs can last up to 50,000 hours and the flame picture is fully adjustable with your smartphone or tablet. In combination with the special anti-reflective glass and the unique flickering effect of the flames, a moving and realistic image is created.

CHOOSE YOUR FAVORITE LOGS

Do you prefer to enjoy an authentic fire, with the familiar brown logs? Then choose 'Woodland'. If you prefer a cooler wood tone that fits a sleek interior, then the "Silver birch" logs are a good choice for you.

LOOKING FOR A STYLISH ELECTRIC FIREPLACE THAT HIGHLIGHTS YOUR INTERIOR?

Discover the versatile collection of electric fireplaces from Element4. Whether you opt for a front-view fireplace, corner fireplace or 3-sided fireplace, our electric fireplaces guarantee a very realistic flame picture and a wide range of installation possibilities. In addition, they come standard with built-in heating and an almost invisible glass plate. That makes every fireplace in our collection an asset to your interior.

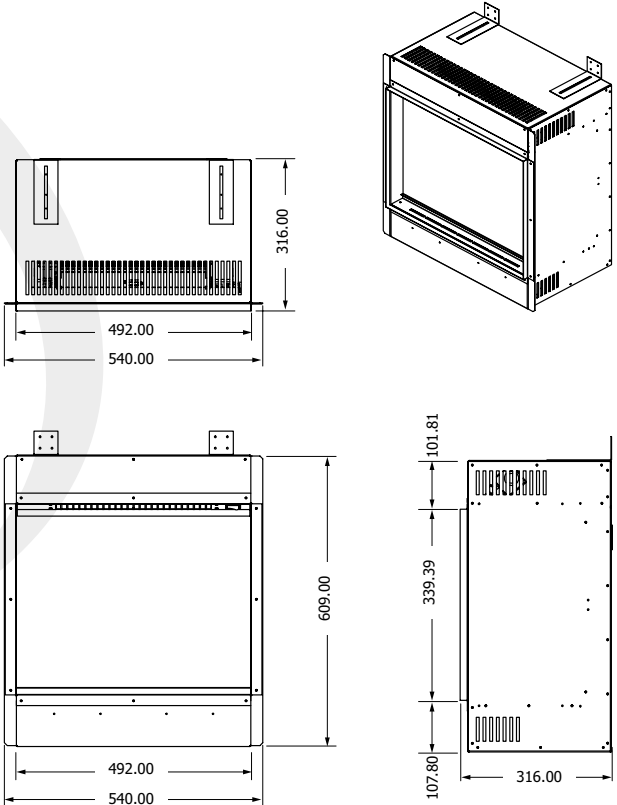

Introduction

FRONT-VIEW FIREPLACES

The front-view fireplace is a real classic. This type of fireplace has one glass plate and offers a magnificent view of the fire at the front. You can perfectly install the front-view fireplace with a mantel or matching casing. You can have an electric front-view fireplace with just 25 centimeters of installation depth. This way you make optimum use of the (limited) space. Be inspired by our collection and discover which front-view fireplace best suits your needs.
